DETAILED ACTION

Double Patenting

1. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

2. Claims 1-8 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-8 of prior U.S. Patent No. 6,806,948. This is a double patenting rejection.

Allowable Subject Matter

3. Claims 9-20 are allowed over the prior art of record.

4. The following is a statement of reasons for the indication of allowable subject matter:

Regarding claim 9, the prior art fails to disclose or make obvious a plasma etch system having logic for normalizing a first reflected spectrum data corresponding to a first shot; logic for normalizing a second reflected spectrum data corresponding to a second shot; and logic for determining an endpoint based on a difference between the normalized first spectrum data and the normalized second spectrum data, and in combination with the other recited limitations of claim 9. Claims 10-11 are allowed by the virtue of dependency on the allowed claim 9.

Regarding claim 12, the prior art fails to disclose or make obvious a system of detecting an endpoint having logic for normalizing a first reflected spectrum data corresponding to a first

shot; logic for normalizing a second reflected spectrum data corresponding to a second shot; and logic for determining an endpoint based on a difference between the normalized first spectrum data and the normalized second spectrum data, and in combination with the other recited limitations of claim 12. Claims 13-20 are allowed by the virtue of dependency on the allowed claim 12.
